Water claims are inconvenient. Water claims disrupt your already busy life and can displace your family for weeks or even months. A water claim not only disrupts your life, it is frustrating and expensive. This is where we want to partner together. If you purchase, or have already purchased, at least 2 water alarm sensors, we will reimburse you a one-time offer of \$75.

If you have an alarm system in your home, you can add water sensors to that system. Systems such as Ring and SimpliSafe also have water sensors you can add to their systems. There are many stand-alone sensors in the marketplace if you only want the water alarm. These sensors will give you peace of mind so you can focus on the things in life that matter the most. If you are interested in this offer, please give our office a call or send us an email to discuss.

Suggestions for water sensor placement: dishwasher, wash machine, refrigerator, utility room, sump pump, etc.
